

## Jeff Youssef – U10 A Head Coach

As a coach, I want my players to visualize the ice and want to predict where the puck is going as opposed to where the puck is.

Maintaining their position, being patient, disciplined on the ice along with showing sportsmanship.

I always preach that every time we hit the ice, we need to learn from the previous time and take that as a lesson and we learn from it.

I'm not only here to teach the kids how to play hockey, I can also teach them how to handle certain situations which will transpire to real life situations.

I've had the privilege of having great coaches when I was that age. They taught me a lot and would like to pass on the message to this young group.
